

# Independent Testing Documentation

**Q20: Does your organization test the overall effectiveness of our information security program using independent auditors, and perform pen-testing using independent pen-testers?**

**Answer:** Yes - We test the overall effectiveness of our information security program using independent auditors, and perform pen-testing using independent pen-testers.

**Additional Comments:** Our organization engages independent auditors to review the overall effectiveness of our information security program on a scheduled basis. Additionally, we conduct regular penetration testing using certified independent pen-testers to identify and remediate vulnerabilities. Findings from these audits and tests are documented, reviewed by our security team, and tracked through remediation plans to ensure continuous improvement of our security posture.
